

# HI-TRAC® CAB-01

The HI-TRAC® CAB-01 is a compact roadside cabinet to house the HI-TRAC 88® and HI-TRAC 90® traffic data collection electronic systems.

The cabinet is manufactured from aluminium with a dark grey textured stove-enamelled paint finish. It incorporates two shelves each with through cable ways and a side mounted cable connection panel.

There is a door front and back for easy access, two secure locks per door and the doors are sealed against ingress of moisture and rain.

The cabinet is supplied with a mounting stool which can be cemented into the ground to provide a solid and secure base. The mounting stool incorporates cable holes to accommodate buried feeder cables from the road installed sensors.

AC mains power connections or solar panel and battery power connections can be accommodated.

## Main Features

- Aluminium construction
- Two equipment shelves
- Cable connection panel
- Two lockable doors
- Ground mounting stool
- Size: 915 x 455 x 330mm (h w d)
